

PEMF Therapy Policy

Policy created: 1st January 2024

This policy will be reviewed on an annual basis.

At Conscious Kids, we are very diligent in ensuring safety measures and precautions are taken place for a worry-free and enriching experience for all users of our PEMF (Pulsed Electromagnetic Field) technology through our Aura Coil.

However, there is nothing to worry about as PEMF (Pulsed Electromagnetic Field) is safe, and child-friendly. The Aura Coil releases electromagnetic frequencies in the background of a room. They have been used in therapy rooms, educational settings with and without children with SEN as well as in the home environment, and are trusted by doctors, researchers, and thousands of individuals around the world.

All substances, all our cells, and even our DNA emit an electromagnetic signature, and The Aura Coil is used to mimic these energy fields that occur naturally in our bodies. It stimulates neural activity and enhances learning by optimizing brain function and cognitive processes. PEMF therapy is a non-invasive approach that allows children to learn comfortably and unobtrusively, promoting relaxation and focus.

The technology has been used on many children in school settings on children with and without special needs and has found profounding results in academic and social abilities (*please visit the following pages for more information:*

Benefits of the Aura Coil Technology in Our Daycare and After-school Clubs:

Incorporating frequency technology at Conscious Kids offers several benefits:

- **Enhanced Emotional Regulation:** Frequencies can help stabilize children's emotions, providing a more harmonious environment conducive to learning and interaction.
- **Improved Focus and Learning:** Certain frequencies are known to enhance cognitive function, supporting better focus during learning activities.
- **Positive Atmosphere:** The overall ambiance of the daycare can be subtly influenced by these frequencies, promoting a space of love, peace, and joy.
- **Support for Special Needs:** Tailored frequencies can specifically aid children with special needs, offering them additional support to engage positively with their environment and peers.

In conclusion, the application of frequency technology at Conscious Kids is a pioneering approach that can significantly benefit the children's emotional, cognitive, and social development

Safety & Guidance of Use

We have guidelines in place for the introduction and continued exposure of Aura Coil to a child, but to also allow careful monitoring of children's progress, and to ensure we take great care in ensuring safe and beneficial delivery of our technology.

While the technology is incredibly safe and there have not been any observed or reported unusual adverse effects from the application of frequencies from a vast number of different aged children (with and without special needs), as a practitioner, I still monitor how the frequencies are affecting everyone inside and outside of Conscious Kids premises via observation of the child's progress and behaviour.

We always start with a very low emission of frequency transmission that is suitable for the youngest and smallest (in mass) child present in the facility and is only used at certain times of the day/session for 25 minutes consistently to ensure maximum benefits to the body and mind.

Please note – the only case where we do not use our technology, are for individuals who have an implanted pacemaker. This is because a pacemaker has its own release of electromagnetic fields. In these cases, to ensure every child can receive the maximum benefits of Conscious Kids facilities, we would advise parents of children with pacemakers, that our daycare and afterschool-club facilities may not be a good fit for a child with a pacemaker. However, we do allow children with pacemakers to attend Conscious Kids 1:1 therapy or for our 1:1 therapy-led tuition. In these instances, we simply carry out our sessions with the technology switched off from the main with extra security that has been risk assessed.

Parental Consent

In most cases, it is more than likely that parents would want to take advantage of the additional therapeutic methodologies we offer for our children at our educational facility. However, if both parties have agreed upon this, or as a parent/carer you simply choose to opt your child out from being exposed to our therapeutic technology, we will ensure your child is not to be exposed to our PEMF therapy technology. In these cases, we will try our best to offer your child the service you most want, however, parents may also need to note that depending on demand, we may only be able to offer your child either 1:1 therapy or therapy-led tuition, where the technology is switched off and therefore not in use for your child's case. In these cases, we can still work towards the goals you wish for your child to achieve - just without the use of the technology.

Expectations

We use the technology intentionally and set clear goals to tailor the delivery of it depending on the type of session your child is involved in. The session will be carefully planned and the PEMF technology will be set up and delivered to ensure the learning objective of the session is met. For example, the technology will aid in a variety of things such as – concentration, the regulation of emotions back to calm, feelings of positivity, and enhancing cognitive ability.

We also expect parents/caregivers to monitor the progress of the child outside Conscious Kid's environment and feedback to us to ensure a healthy communicative feedback loop. This way we can provide the best possible service to meet your child's needs.

Contact Info

If you have any inquiries, concerns, or further clarification regarding the technology, our protocols, guidelines, and how we monitor progress, please contact us at info@conscious-kids.co.uk. We are also happy to share more research studies, answer any questions, or even direct you to the correct professionals and creators of the Aura Coil. Please also visit <https://conscious-kids.co.uk/our-technology/> for more in-depth information.
